Summary:

Hello, my name is Stanislav Rud. I looking for my first job as a Trainee / Junior Front-End developer. I have small, non-commercial experience in developing websites, landing pages, I have HUGE desire to develop, improve and continue! Use my skills in real projects!

More than 3 years of experience working with hosts on such platforms as: ESXI, Hyper-V, Proxmox, more 1.5 years deploying web servers on Apache24, Ngnix, ISS, and their support. Introduced Jira CRM system to provide user support from developers. Configured the monitoring system. Debugged the servers. Worked with servers as Supermicro, Dell, IBM, Cloud QNAP.

In free time, I create single-page websites according to layouts. Learn React, JS, TypeScript, English, Also I constantly improve my skills in website development.

I have an understanding and basic experience working with such assemblers as Gulp, Webpack, Grunt, React.

Have experience with WebStorm, VSCode, Emmet, Photoshop, Figma.

Work Experience:
